CONSTRUCTION UPDATE

CTH F (Black Bridge Road – USH 51)

August 26, 2016 – September 9, 2016

General Information

- The project has been delayed during the month of August as we have experienced above average rain events which has not only caused delays in getting the work completed, but has also caused us to put extra effort into keeping the roadway passable for local traffic.

Utility Work

- Most of the utility work is complete. There are final items being completed over the next week or two.

Construction Activities

- Excavation and base course placement began last week and is ongoing.
- Culvert replacement and storm sewer work on the southern half of the project is anticipated to start next week.
- The excavation and base course placement will temporarily cease during the culvert and storm sewer work as construction accessibility will be limited.
- Due to forecasted rain events next week, the culvert and storm sewer work may be delayed. Excavation and base course placement may continue if weather permits.

** All activities scheduled are weather dependent.*
